Portfolio: https://manideep007996.github.io/manideep_profile/

PROFESSIONAL SUMMARY

Full Stack Developer with 5 years of experience specializing in React.js, Redux, and TypeScript, plus 3 years of Node.js/Express backend experience designing REST and GraphQL APIs, building scalable, responsive web applications for government, banking, and enterprise platforms. Proven expertise architecting role-based dashboards, custom query builders, and GIS-based geospatial mapping and data visualization, with hands-on command of REST API integration, WebSocket live updates, Apache NiFi-driven data pipelines, and JWT authentication. Skilled at translating Figma/UX wireframes into accessible (508-compliant) React interfaces across agile teams of 10–18 members.

TECHNICAL SKILLS

Core Frontend: JavaScript (ES6+), TypeScript, React.js, Redux, Redux Toolkit, React Hooks
UI & Styling: HTML5, CSS3, Bootstrap, Material UI, Syncfusion, Responsive Design
Data Visualization: Chart.js, Leaflet.js, GIS/geospatial data visualization, PDF/Excel reporting
API & Integration: REST APIs, GraphQL, Axios, AJAX, WebSockets, JSON, JWT Authentication, Apache NiFi
Backend & Database: Node.js, Express.js, MongoDB, Mongoose, MVC Architecture
Testing & Accessibility: Jest, Section 508 Compliance, NVDA screen-reader testing, Postman, Swagger
Tools & Workflow: Git, GitHub, GitLab, npm, Yarn, Vite, Jira, Azure DevOps, VS Code, Figma; Windows, Linux
Concepts: Role-Based Access Control (RBAC), Component Architecture, Performance Optimization, Agile/Scrum, SDLC

PROFESSIONAL EXPERIENCE

Senior Software Engineer | PruTech IT Solutions **Jun 2024 - Jul 2026**

Hyderabad, India

ICCC Converge - Bihar State Cooperative Bank *Feb 2025 - Jul 2026*

- Led frontend development from inception across dynamic dashboards, query builder, bank/branch management, and user role management using React.js, Redux Toolkit, and Vite, converting Figma wireframes into 30+ reusable React components.
- Architected a role-based Dashboard Builder for 4 user types (Super Admin, Head Office Admin, Bank, Branch) with configurable widgets (cards, charts, tables, maps, tree selectors), draft/publish workflows, and bank/branch-level data filtering; rolled out across all 24 cooperative banks in Bihar, reducing new dashboard setup time by 60%.
- Created a Query Builder enabling non-technical users to build table joins, aggregations, filters, and sorts, and to save and reuse queries as widget-level live data sources, integrated with Apache NiFi and Node.js APIs for backend query management.
- Implemented RBAC and secure communication modules supporting real-time incident, alert, and analytics monitoring across the ICCC platform, and improved initial dashboard load by defaulting widgets to a single bank's data with on-demand bank/branch switching.
- Owned the Grievance/Ticketing module end to end for 6 roles (L1, L2, L3, Head Office, Super Admin, Support Admin), covering dynamic validation, SLA-based auto-escalation, hierarchical reassignment, status workflows (In Progress, Pending, Resolved, Closed, Reopened), bulk actions, WebSocket notifications, and PDF/Excel export, cutting resolution turnaround by 40%.

iResponse - Bihar Flood Management *Jun 2024 - Feb 2025*

- Engineered the Situation Awareness / GIS page with real-time mapping and spatial data visualization for statewide disaster monitoring, plotting incidents by latitude/longitude with linked media (images and video) for faster field assessment.
- Built 6 monitoring dashboards (Flood, Fire, Human Loss, Heatwave, Coldwave, Incidents) with interactive charts and GIS maps, and delivered the Task and SOP Management module with assignment tracking and live progress monitoring.
- Automated reporting with UI-driven data-capture forms and PDF/Excel report generation using Node.js, Express.js, and MongoDB (Mongoose), matching required formats and cutting manual report preparation by 50%.

Software Engineer | Birlasoft **Aug 2022 - Mar 2024**

Client: Conduent | React Developer | Team of 18 | Hyderabad, India

- Developed responsive web apps and new React.js components from UI/UX wireframes, managing state via props and Redux.
- Integrated RESTful APIs and fixed a high volume of production defects in the Finance module, improving client-facing stability.
- Wrote Jest unit tests for React components and validated UI against Section 508 compliance and NVDA screen-reader testing.

Associate Software Engineer | Ensar Solutions **May 2021 - Jul 2022**

Client: Tele Teachers | Full Stack Developer | Team of 15 | Hyderabad, India

- Built responsive React.js applications integrating REST and GraphQL services, with UI components on Material UI and Syncfusion.
- Developed a Node.js/Express server with router-based REST APIs and JWT-based token authentication for user registration and login.
- Built a time-slot booking feature for parent-teacher appointments, with slot availability and conflict handling.

EDUCATION

B.Tech, Electronics and Communication Engineering | CMR Engineering College, Hyderabad 2020
